Hypothesis in educational research
What is hypothesis?

- Hypothesis is considered as an intelligent guess or prediction, that gives direction to the researcher to answer the research question.
- Hypothesis is defined as the tentative or expected prediction or explanation of the relationship between two or more variables in a specified population.
- A hypothesis is a formal tentative statement of the expected relationship between two or more variables under study.
• A hypothesis is a formal tentative statement of the expected relationship between two or more variables under study. • A hypothesis helps to translate the research problem and objective into a clear explanation or prediction of the expected results or outcomes of the study.

• 4. • Hypothesis is derived from the research problems, literature review and conceptual framework. • Hypothesis in a research project logically follow
